

Petition for Windstream to Bring DSL to Hog Valley

Petition summary and background	The residents of Hog Valley, Marion County, Florida request that Windstream Communications install the necessary equipment to allow their customers access to broadband DSL Internet services. We understand this could be made possible in an area of about 3 miles surrounding the old Hog Valley Block house by installing the proper equipment.
Action petitioned for	We, the undersigned, wish to have the same DSL made available that others in the Windstream service area have, and we ask that Windstream bring DSL services to all of the Hog Valley area as soon as possible.
